

Power Flushing

IMPROVE HEATING EFFICIENCY

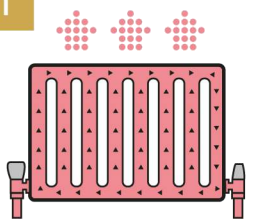

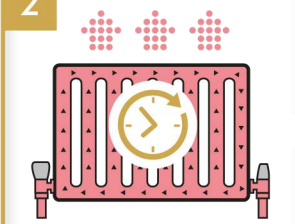

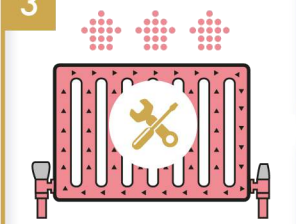

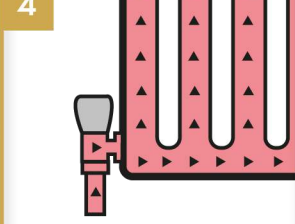

SYMPTOMS

<p>1</p>  <p>Slow to heat up - indicative of blockages</p>	<p>2</p>  <p>Little or no hot water - potential buildup</p>	<p>3</p>  <p>Cold spots on radiator</p>	<p>4</p>  <p>Banging noises from boiler</p>
---	--	---	--

POWERFLUSH PROCESS

<p>1</p> <p>Corrosion, acidity and alkaline levels tested</p> 	<p>2</p> <p>TDS (total dissolved solids) reading taken from mains cold water</p>	<p>3</p> <p>Heating is turned on</p> 	<p>4</p> <p>Flushing pump connected</p> 
<p>8</p> <p>Corrosion inhibitor added</p> 	<p>7</p> <p>Cleaning agent added, system is cleaned</p> 	<p>6</p> <p>System is flushed out</p> 	<p>5</p> <p>Radiator hammer tool loosens sludge</p> 

RESULTS

<p>1</p>  <p>More efficient heating</p>	<p>2</p>  <p>Faster heat-up times</p>	<p>3</p>  <p>Save on regular repairs</p>	<p>4</p>  <p>Prevention of future blockages</p>
